LATIN AMERICA PATENT DATA

FULL-TEXT COVERAGE IN ENGLISH AND LOCAL LANGUAGES

As innovation activity in the Latin America region continues to rise, getting your hands on relevant patent data is more important than ever.

But that can be challenging, since most content is unavailable in English, and coverage is often incomplete in the original filing language.

That's where Thomson Innovation® and Derwent World Patents Index® can help.

In a single platform, you can search full-text content from Argentina, Brazil and Mexico—in English, or the local language. It's an easier and faster way to identify opportunities and risks in these key emerging global markets. So you can make IP decisions with greater certainty.

COVERAGE DETAILS

ARGENTINA

- Applications - full-text, 1974 to date; bibliographic 1973 to date
- Utility Models – full-text, 2003 to date; enhanced bibliographic 1997 to 2002

- Granted patents - full-text 2008 to date
- Utility Models – full-text, 1982 to date; bibliographic, 1980 to date
- Portuguese and English (human-assisted machine translations)

MEXICO

- Applications – full-text 1997 to date
- Granted patents - Enhanced bibliographic, 1992 to date (new law); bibliographic 1982 to date (old law)
- Spanish and English (human-assisted machine translations)

MORE ACCURATE, COST-EFFECTIVE PATENT DATA

Having immediate access to patent data in English or the local language enhances your IP research and improves your workflow. With the translated data in Thomson Innovation, you can:

- Save time by easily accessing Latin America patent data alongside other global patent sources
- Save money by eliminating expensive translation costs
- Increase productivity by searching global patent and non-patent content—in a single query
- Make more informed decisions about your IP strategy

OVERCOME LANGUAGE BARRIERS

Through DWPI, we offer English-language coverage from 50 sources (48 patent-issuing authorities for patent documents and 2 journal sources) issued in more than 30 languages. And with Thomson Innovation, the 'translations on demand' feature lets you immediately translate search results into many major world languages—making it faster and easier to determine the relevancy of a patent.
